Cube mattress with removeable cubes and ultrafine anatomical adjustment

aks-varioplus is the highest quality cube mattress within the product family and represents a further development of the aks-varioplot. It offers the patient optimal pressure ulcer therapy via the possibility of specific hollow positioning with individual fine adjustment. The freely removeable and interchangeable cubes of this mattress are of varying degrees of thickness and firmness.

On delivery, the mattress is already fitted with soft and firmer cubes, corresponding to anatomical requirements.

Exact adjustment of the mattress to the individual requirements of the patient, and thus optimal positioning, are guaranteed by this special structure and the dimensions of the varioplus cubes, which are smaller than those of the aks-varioplot. The individual anatomical adjustment of the aks-varioplus offers outstanding pressure ulcer therapy with optimal soft positioning and pressure distribution.

The stability of the mattress is guaranteed by the installation grid system for the individual cubes, so that the personal comfort of the Patient is considerably increased.

At the same time, the installation frame is so flexible that the small cube mattress adjusts to any bed surface setting.

The special cube construction leaves room for sufficient air circulation and thus for a "healthy climate" between the patient and the mattress. This air exchange prevents heat build-up, and perspiration is considerably decreased.

The high quality foam of the aks-varioplus is produced CFC-free, and the individual cubes of the mattress are washable, autoclaveable, anti-allergenic and active-breathing.

Order No.	Dimensions
4510	90 x 200 x 15 cm, 1-split

Technical data:

Weight:
approx. 11 kg

Weight of unit volume:
(green) 26-29 kg/m³,
(grey) 36-39 kg/m³

Firmness:
(green) 3.1 kPa,
(grey) 3.5 kPa

Includes:
inco-air
protective cover
